

Cashier monitoring

CASHIER MONITORING module

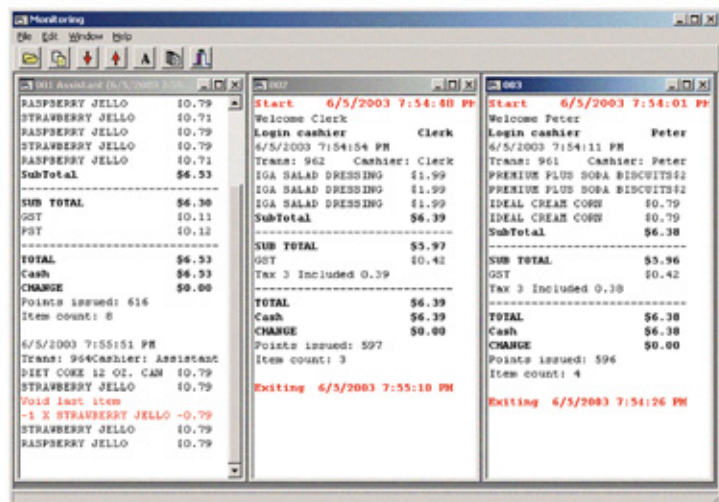

L-POS and L-BOSS include an on-line cashier monitoring system.

You can monitor multiple terminals simultaneously and control cashier performance while keeping an eye on sweet hearting.

Cashier monitoring will assist you to control unknowns by catching them as they occur.

System features include:

- Easy set-up.
- Monitor multiple lanes simultaneously.
- Produce an audible tone when voids or other negatives are recorded on an L-POS terminal.
- Output data to digital recording systems in popular formats.
 - RS232 with programmable communication parameters.
 - TCP or UDP with user defined IP and port address.
 - Programmable data identifier to differentiate data from multiple POS terminals.
- System recovers from power down and restores previous settings to ensure maximum security level.

System requirements

Windows XP or Windows 2000.
PC PIII 700 or greater with 256 meg ram and 30 gig hard drive.
